end goal → import part + parameter

Step 1 : map from original file to parts

Step 2 : use parts file to import parts

Step 3 : use imported parts id to fetch its parameter id

Step 4 : map parameter id to coresponding parameters values

Step 5 : import parameters using parameter file

Authorization method : Username + password

issues
- ~~parts get~~ IPN value not getting imported
- mapping parameter values
- importing parameter (?) (depends on 5)

successes
+ parts getting imported
+ if mapping is successful, high chance of success
+ bulk delete tool works

Pages + their modules | sections

(main page)

importer

modules :
- upload files (parts + parameters) → csv
- import parts
- fetch parts id
- downlod files (mapped parts id) → csv
- import parameters
- log (to see results)

(map page)

mapper

modules :
- upload files (original + mapped parts id) → excel & csv
- mapping parts
- mapping parameters
- downloading files (parts + parameters) → csv

(fetches param id)

fetch param   (needed ?)

modules : - upload files (mapped part id)
- mapping parameter id
- download (mapped parameter id)
